

November 13, 1956

Prof. R. W. Lewis
Michigan State University
E. Lansing, Michigan

Dear Dr. Lewis:

I have your request of the 12th for a culture of *S. typhimurium* and information on its pathogenicity.

Dr. Norton Zinder at the Rockefeller Institute has been working on this system, and surely would be able to be more helpful than I could. I have taken the liberty of forwarding your letter to him.

Yours sincerely,

Joshua Lederberg
Professor of Genetics
