

2 May 1953

Dr. Ethel McNeil
Dept of Animal Pathology & Hygiene
University of Illinois
College of Veterinary Medicine
Urbana, Illinois

Dear Dr. McNeil:

I am enclosing a letter I received from Dr. Lederberg together with my reply. You will note that he is asking for some of the strains of *S. pullorum* which we found to be maltose-positive variants. I hope that you do have some of these which you can send to him. You will note also that I am sending the reprint, which I believe is by Taylor and myself, for which he asked. If you have others in which you think he might be interested and have not sent them on to him, you might send them also.

Best wishes--

Sincerely yours,

WRH/alh
