DEPARTMENT OF PLANT PATHOLOGY

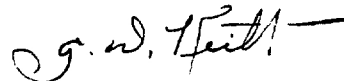

July 18, 1947

Dr. Joshua Lederberg
Osborn Botanical Laboratory
Yale University
New Haven, Connecticut

Dear Dr. Lederberg:

Your letter of July 13, requesting reprints of our papers on Venturia inaequalis, is received. I take pleasure in sending you several separates that are available. I should be very glad to have reprints of any of your work on genetics of micro-organisms either now available or forthcoming. I should especially like a copy of your review paper. If your copies for distribution are limited I should be glad to purchase one from the publishers if you will be good enough to advise me of the channel of publication and the opportunity for purchase of separates.

Yours sincerely,

G. W. Keitt
Professor of Plant Pathology
Chairman of the Department

GWK:S

P.S. Manuscripts for the next two papers of our series on V. inaequalis are nearly complete. I shall be glad to send you separates when they are available.
G. W. Keitt
