Dr. Joshua Lederberg
University of Wisconsin
College of Agriculture
Department of Genetics -

Dear Dr. Lederberg -

I am interested in obtaining reprints of your publications concerning biochemical mutants of *E. coli*. At present, I am trying to gather information about certain of your methods & results as I may be working with some of your cultures in the near future. I shall be working with Dr. Sandberg here at the U. of Cal. on problems which may be of interest to you too. At the moment this project is still in its infancy so any help from you will be greatly appreciated.

Sincerely,
Harold P. Klein
