Dear Doctors:

I hope that you will forgive me for being a poor correspondent.

I am going to attend the International Conference of Electron Microscopy which, as you already know, is going to be held from the 15th to 21st of July in London. After a brief visit to various countries in Europe, I am planning to visit U.S.A. about the middle of September. If time permits, I hope to visit your Institute.

I am looking forward in meeting you.

Cordially yours,

Masanaka TERADA, M.D.
President of the Tokyo Jikei-kai
School of Medicine.
