MILWAUKEE 2, WISCONSIN

PRACTICE LIMITED TO  
INTERNAL MEDICINE

Feb. 14, 1952

Prof. J. Lederberg  
Genetics Building  
University of Wisconsin  
Madison, Wisconsin

Dear Dr. Lederberg:

I am interested in doing single cell isolation studies with bacteria and was told by the Aloe Co. that you have a de Fonbrune micromanipulator with which I assume you are working with single cell cultures. Before I bought the instrument I wanted to ask if you have found it satisfactory for isolation of single bacteria and if you might be willing to show me your technique.

Sincerely yours,

*Burton Waisren*
