

November 12, 1947.

Dr. Mary Jane Ward,  
Lilly Research Labs.,  
Eli Lilly & Company,  
Indianapolis 6, Ind.

Dear Dr. Ward,

I have transferred and hope to send you shortly under separate cover the cultures:

Y-9, Y-10, Y-26 and 58-3214. The last requires biotin and proline and is indistinguishable from 58-5255 which I mentioned earlier. Let me know whether I can be of any further assistance.

Sincerely,

Joshua Lederberg  
Ass't Professor of Genetics.
