

6/25/51

Dear Josh,

Enjoyed the chapter very much. It will be a useful thing indeed in teaching new students. Jane glanced through it, and I must agree with her - it is damn well written.

I have only two minor comments.

1) Page 97. ^(footnote) Though we did find no accumulation of mutants in resting cultures, we did not report this observation - as stated in footnote.

2) Page 99 - 6th line from bottom. — definite article before "zero term..." ?

By the way are any arrangements being made to reproduce your C.S. H. ms? We would like a copy very much.

I caught my first cold the Saturday after the symposium and am just recovering.

Regards to Esther

Baron
