

Novick

12/21/52

Dear E & J,

I forgot how much  $\lambda$   
was to get. I gave it 200,000 r.  
Irradiation was at 1000 r/min at 250 kv

My visit was extremely  
pleasant. Many thanks again.

If you want more samples  
X-rayed, send them down or better  
still come yourselves.

Regards

Aaron

Dear Josh,

No doubt this is either  
silly or you have done it.

~~Do you~~ Take FA from two  
donors - one donor exhibiting  
an antigen the other not.  
the donors being "like in all other  
respects". If you treat the  
two FA preps ~~to~~ <sup>with</sup> the antiserum  
for this antigen, will you  
inactivate the transducing power  
of the FA?

Carson

P.S. Trust you received X-rayed sample.
