Department of Genetics
Madison 6, Wisconsin

Dear Doctor Lederberg:

Thanks for the additional instruction sheets. We have every intention of developing this into a substantial research project, and applying for a subsidy from the U. S. Public Health Service or other sponsor. Just now we are tied up in negotiations with Camp Detrick on another project which, if it goes through, will use up all the personnel and space we have. Until this project is settled, we have only spare time for the silica gel study but I do want to keep it going so as to be able to expand it to a major operation at first opportunity.

Sincerely yours

Freeman A. Weiss
