INSTITUTE OF MOLECULAR BIOLOGY

Dear Josh,

I am still trying to arrange the AAAS symposium in Eugene next June 14 on ~~"Space"~~ ^{"The"} "Exploration of Space". Neither Calvin or Urey can make it. Carl Sagan will come and I have tentatively accepted two people from the JPL at Dick's suggestion. Eyring would like to see some big names on it, but I prefer to hear the people doing the work. We still need a moderator and possibly a speaker. Is there someone from the Space Science Board that you might suggest?

I am very sorry to miss the Feb 29 meeting as it sounds like an ^{especially} interesting one. My ~~own~~ itinerary in

next two weeks is

Feb 19-23	NYC with Szilard
24-26	Biophysical Society Mtg - Philadelphia
27-28	NYC
29-Mar 1	NSF panel in Wash
Mar 2	Chicago
Mar 3	Eugene,

Best regards
Aarn

P.S. Obviously I will be very grateful for any help
with the Symposium.
