Dr. Joshua Lederberg
Department of Genetics
University of Wisconsin
Madison 6, Wisconsin

Dear Joshua:

Would it be too much trouble to ask you to send me whatever references there are to work on recombination in bacteria other than K 12? I still haven't come across this and am about to get to that part of my Genetics of Microorganisms course and would like to bring in to it the confirmation on other strains.

With very best regards, as always,

Cordially yours,

T. M. Sonneborn
