VIA AIRMAIL

Dear Max,

Please disregard my comments on the Xyl segregation in "H-72". My copy of the culture I sent you is Xyl~~+~~, not segregating for Xyl~~+~~, and probably means that H-62 was sent you instead, which is essentially the same except for the Xyl segregation. I am reisolating H-72 from older stocks, and will also have some others like it, very soon.

With my apologies,

Sincerely,

Joshua Lederberg
