URBANA

10/9/52

Dear Joshua,

We have put off our visit to Madison partly because I am rushed in trying to finish my book, partly because all boys are working on prelims etc. - We would like some date early in ~~the~~ November, and Beyer from Purdue would come along - Also, Ceruthal might come from Ann Arbor -

Another reason for delay was that Van Potter told me he would invite me for one of the enzyme lectures this fall - I haven't heard from him and imagine the thing is forgotten, but you may call him up and ask him -

If there is no lecture in night, November 14-16 may be the best date - I'll check with the others when I hear from you again.

Best regards,

Lu
