25th Sept '58

Dear Dr. Lederberg,

I am presently engaged in a study of 'genetic recombination in Vibrio cholerae', preliminary results of which have appeared in the J. gen. microbiol, 19, 71, 1958. Your published papers on conjugation in K 12 and transduction in Salmonella have provided considerable stimulus to me in this study. I will appreciate very much if it will be possible for you to let me have a collection of your reprints on this subject.

With kind regards,

Yours sincerely,

*K. Bhaskaran.*  
25.9.58.

Dr. J. Lederberg,  
Department of Genetics,
