Bodmer

25th August 1965.

Dear Tosh,

I saw and interviewed Oishi
in New York as planned. He is quite articulate
and easy to communicate with. He is also fairly
definite in his wish to continue along more or less the
same lines as he has been doing with Szeoka.
He is going to the Genetics Society meeting in Fort
Collins, so I suggested he should come on to Stanford
after the meetings, at least for a day or two. I will
be here then (12-13th September) and, following
our usual policy, I think it would help if at least
you and Van would also see him. I think the
expense involved in paying his way from Colorado
would not be wasted as I would consider it quite
likely we would judge him good enough to take on

BODMER

I am now staying with Lucia in Milan
having had a very enjoyable weekend with
the family at the seaside. We are in the middle
of writing the paper for Belgrade, which may
just get finished in time.

Please give my love to Esther,

Yours Walter
