

LONG ISLAND BIOLOGICAL ASSOCIATION
COLD SPRING HARBOR, NEW YORK

BIOLOGICAL LABORATORY

Monday 24th July.

Dear Professor Udeyberg,

I am just writing to let you know when I will be arriving at Stanford during. I am flying from New York on Monday August 3rd by flight AA17 due to arrive at San Francisco about 2.30 pm.

We are now just half way through the phage course. So far it has been very interesting and we seem to be covering a fairly comprehensive range of techniques, there has also been a very good series of seminars associated with the course.

I am very much looking forward to my stay in Palo Alto and to seeing you and Mr Udeyberg in a fortnight time,
Yours sincerely
Walter Berchner
