Doctor Waclaw Szybalski  
Institute of Microbiology  
Rutgers University-The State  
University of New Jersey  
New Brunswick, New Jersey.

Dear Doctor Szybalski:

I will be most pleased to present a paper on heterokaryosis in streptomycetes at the one-day conference devoted to the "Genetics of Streptomyces and Other Antibiotic-Producing Microorganisms". The conference, which is sponsored by the New York Academy of Sciences, is to be held on January 6, 1959.

Dr. Lederberg and I have not collaborated on the genetics of streptomycetes for the past 2 years. I will have to write to him about his inclinations on joint presentation. I personally believe that Dr. Lederberg would best serve as a correlator or summarizer (discussant).

I would be happy to participate in a separate discussion on the genetics of Streptomyces coelicolor. Dr. Sermoniti, of course, is the logical choice to begin this discussion. I hope that it can be arranged so that he will still be in the USA January 6.

I will be much interested in hearing as plans for the conference develop. If I may be of assistance in facilitating organization and development of the conference, please do not hesitate to write.

My very best wishes to you for your continued success.

Dear Josh:

Please advise. Haven't heard from Sermoniti for a couple months but assume all is well. We expect him first part of Sept. Hope to visit you then.

Sincerely,

S. Gayle n Bradley.
