

RUTGERS UNIVERSITY

The State University of New Jersey

INSTITUTE OF MICROBIOLOGY

NEW BRUNSWICK, NEW JERSEY

CHARTER 7-1766

June 12, 1957

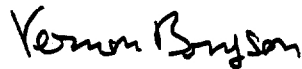

Dr. Joshua Lederberg
Department of Genetics
University of Wisconsin
Madison 6, Wisconsin

Dear Josh:

The enclosed announcement may be able to induce some response when it gets published in "Science". Meantime, if you have any suggestions as to who might write an acceptable monograph for subsidized publication, please let me know. If you are not all "written out" at present, we would, of course, welcome anything you might care to do yourself. The advance stipend will be about \$500, one-half on delivery of manuscript, one-half at once. Royalty terms are not yet worked out but will not be very enticing, since we hope to Veritype the material and publish at costs compatible with graduate student finances.

Best regards.

Sincerely yours,

Vernon Bryson
Associate Director

New Publication Series

The Institute of Microbiology at Rutgers University is initiating the publication of a series of book-length manuscripts on subjects that relate to the science of microbiology.

Primarily, the series has a two-fold aim: 1. It is designed to offer an outlet for specialized contributions in the field of microbiology that are of relatively limited interest to commercial publishers, and to existing scientific journals. 2. Present plans also concern the publishing of biographical and historical studies in microbiology.

This program is operating with the financial assistance of the Foundation for Microbiology. Although volumes for the series are being assembled by invitation, comments from any scientist are welcome with reference to desirable subjects, or in regard to authors qualified to fill existing needs. Prospective contributors are invited to express their interests. Comments or suggestions may be sent to any member of the Editorial Advisory Committee, or to Vernon Bryson, Institute of Microbiology, Rutgers, The State University, New Brunswick, New Jersey.

Members of the Editorial Advisory Committee

- Vernon Bryson, Institute of Microbiology
- Rene J. Dubos, Rockefeller Institute for Medical Research
- Harry Eagle, National Institute of Health
- Michael Heidelberger, Institute of Microbiology
- A. Lwoff, Institute Pasteur, France
- K. F. Meyer, Wm. Hooper Foundation, University of California
- Francis Gordon, Naval Research Lab.
- J. R. Porter, State University of Iowa
- Kenneth B. Raper, University of Wisconsin
- William J. Robbins, New York Botanical Garden
- R. Y. Stanier, University of California
- Edward L. Tatum, Rockefeller Institute for Medical Research
- Selman A. Waksman, Institute of Microbiology
- Perry W. Wilson, University of Wisconsin
- H. Boyd Woodruff, Merck & Co.
