Dr. Lederberg
Palo Alto, Cal.

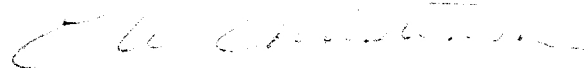

June 25, 1960

Dear Dr. Lederberg:

On several occasions we have had inquiries requesting the formulation of your modified EMB Agar for genetic studies. The medium has been referred to as EMS Medium of Lederberg. We have been unable to find this in the literature and would appreciate your giving us the reference to your publication describing the medium and its uses and if possible to send us reprints on such articles.

Thanking you for this service, I am

Yours very sincerely,

C.W. Christensen, Ph.D
Director, Microbiology

fd

See: Methods in Medical Research 1950
3: 5 table 1C

Subsequently also used with omission of succinate
see: encl. ref. 11.
