Dear Dr Lederberg

Thank you for your letter of July 29 which just reached me in Boston. It would certainly have been nice if I could be of any use in connection with your project. I am sorry to say that my San Fransisco stay will ^{the night/} this time be only barely one day ~~x~~ (September 2-3) sandwiched in between a lecture in Pathology department of Dallas and one in Tokio. Before that I spend some days in Nat. Ca. Inst. in Bethesda next week. I am sorry that I did not get your letter a little earlier - in fact the Tokyo arrangements were made only a few days ago but cannot be changed now. I will be back in this country again for a short visit end of February , but I guess that is late for you.

With best regards I am

Sincerely yours,

Forbjörn Caspersson
