STANFORD, California

Dear Joshua,

We are sending to you, under separate cover, the September issue of *Tempo Medico*, where we have published your interview and the articles about bacterial genetics.

Visconti and I personally feel very grateful and want to thank you very much for your kind cooperation.

I have read on Science, June 1958, a paper of yours dealing with Moondust. Could you tell me please where I could find more on this subject; is it worthwhile reading the proceedings of the meeting mentioned in the paper?

In fact I am planning, after Lunik II, to write on astrobiology for the next issue of *Tempo Medico*.

Excuse me if I take advantage of your kindness.

Sincerely yours,

Ruggero Ceppellini
