

WASHINGTON UNIVERSITY  
SAINT LOUIS

THE HENRY SHAW SCHOOL  
OF BOTANY

February 2, 1956

Dr. Joshua Lederberg  
Department of Genetics  
University of Wisconsin  
Madison, Wisconsin

Dear Joshua:

We have decided to appoint a new staff member to the Botany Department, and would like to find a person whose primary interest is in the genetics of micro-organisms (bacteria, fungi or algae). The appointment could be at the rank of Assistant or Associate Professor, in a salary range of \$4500-7500, depending on the candidate's qualifications.

I would be grateful for your suggestions on possible candidates. Can I hear from you soon?

With best regards.

Sincerely yours,

Barry Commoner
