Dear Joshua,

I am sorry that your letter of Nov. 27 has not been answered for all this time.

I have discussed the matter with Giovanni and we have no objection and fully agree that you discuss chemopoiesis application to steroids with the Sintex group as you wish to do.

Please forgive me for not having replied to you sooner, but it was not my fault.

I will answer later your letter of Dec. 18.

Yours sincerely,

L.L.Cavalli-Sforza
