6th. October, 1950.

Dear Dr. Cavalli,

I am making some headway with my investigation into the question of recombination in *Bact. coli* K12 but, just at the moment, I am held up because I have no threonine. If you have any to spare I would be very grateful if you could let me have about two grams to be going on with. I have placed an order for this amino-acid but, by the time the stuff arrives I expect a month or so will have elapsed which I do not want to lose. When I get my own supply I will at once return the amount you have lent me - that is, of course, if you can.

As soon as I get any definite results which I consider of any value I will let you know about them.

Yours sincerely,

A handwritten signature in cursive script that reads "William Hayes".

(Dr. William Hayes)
