Dear Dr. Cavalli,

I wrote to you yesterday asking if you would be kind enough to let me have some threonine until I can get some of my own. On looking over the details of my proposed experiment I now find that I also require biotin which I had been hoping to be able to manage without. I am sorry to trouble you again, but could you let me have a milligram or so of biotin? If you cannot manage this, would you let me know from whom I can obtain some or who manufactures it commercially? I require enough to supply the requirements of the K12 mutant 58-161 for a dozen or so plates. I gather that the requirement of this vitamin is minute.

Yours sincerely,

A handwritten signature in cursive script that reads "William Hayes".

(Dr. William Hayes)
