6 July, 1952.

Dear Cavalli,

Here is an abstract of my anticipated Pallanza paper. It is exactly 60 lines! I hope you will be presenting your views on this controversial subject.

I forgot to say in my recent letter that if I can do anything for you in the way of correcting proofs of your JGM paper I will be only too happy. I expect, though, that you would like this done by someone more "up" in genetics. But let me know if I can help.

With best wishes,

William Hayf
