10 March, 1953.

My dear Luca,

This is just a brief note enclosing a copy of a letter to Jim which I thought might interest you. I hope it is reasonably clear — probably not as it was composed at the typewriter!

Jim may have told you that I am going to spend six months with Delbruck at Pasadena, beginning at the end of August, so much to my regret (and Nora's) the Italian meetings will be out this time. I didn't let you know before as the thing had not been definitely arranged.

Do'nt forget to send me a copy of the Cav., Led. & Led. paper. Is there any chance of your coming to the S.G.M. symposium starting April 14? We still have a spare room.

One of the pleasant features of working at Pasadena will be the constant association with people interested in K-12. Sometimes, though, I get heartily sick of it myself and feel some nice, simple investigation would be preferable. This week is one of those times! Do'nt bother to write if you are busy. Best wishes to Pupa from Nora & myself.

Yours,

*Bill*
