DEPARTMENT OF CHEMISTRY

July 16, 1962

Professor J. Lederberg  
Department of Genetics  
School of Medicine  
Stanford University  
Medical Center

Dear Joshua:

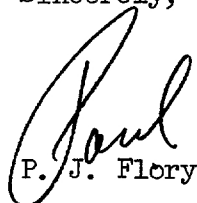

I think the evidence indicates that Eigen will not accept our invitation, nor do I think it is likely that he will take any other of the various offers tendered to him by other American universities-- at least not in the near future.

Marvin Chodorow's expansion of the Applied Physics Division, and his strengthening of instrumentation here should be a definite asset in other campaigns we have under consideration. I look forward to meeting him and learning more of his plans.

*Flory*

Thanks for your note.

Sincerely,

  
P. J. Flory
