NAPOLI

I am writing from the  
wonderful bay of Naples  
the.....

24 Mar 61.

Dear Josh;

I am sorry that I was  
unable to put anything together  
for Dr. Leventhal's consideration before  
leaving for this Nato exercise. It  
may be just as well since no one  
now knows just what will ensue  
for space biomedicine with this  
new command reorganization. I can  
only hope that our major laboratories  
will remain with only a single point  
of technical direction & support.

I have asked our programming people to keep \$ 30 M earmarked for me until June 1<sup>st</sup> & have been given reasonable assurance that such will be done.

I will know much more of the immediate future upon my return next Tuesday the 30<sup>th</sup> and will still endeavor to work out a program with Dr. Leventhal prior to the turn of this fiscal year.

Certainly enjoyed my brief visit with you and will try to arrange another trip in April or May.

Sincerely  
Don
