1st August, 1961.

Dr. Joshua Lederberg,
Department of Genetics,
Stanford University,
PALO ALTO, Calif. U.S.A.

Dear Josh,

I will be in California for a few days early in October before going over to the Macy Foundation Symposium, where I will see you again.

I plan to arrive in San Francisco on 1st October (Sunday) and spend three days at Berkeley and San Francisco, and then Thursday and Friday at Stanford. On Saturday I'm going by daylight train to Seattle so I'll probably have to leave Palo Alto on Friday evening. I would very much like to see you and your set-up there. I would also like to see Drs. Regnery and Schwerdt, and I have written separately to them.

If you think it appropriate I could give a talk on "Interactions between Poxviruses". Some are genetic and some, I believe, non genetic.

Please give my regards to Esther, and to Gus Nossal.

Best wishes,

Yours sincerely,

Frank Fenner
Professor of Microbiology
