

CARNEGIE INSTITUTION OF WASHINGTON
DEPARTMENT OF GENETICS
COLD SPRING HARBOR, LONG ISLAND, N. Y.

April 25, 1958

Dear Dr. Lederberg,

Thank you for your letter dated April 22. I should be very glad to give a lecture in Madison. You suggested my recent work on transduction of colicinogeny by phage as a topic. I think I have not yet enough data to give a lecture only on that topic and I should prefer a more general subject ^{such as} like "Colicins and colicinogenic factors" in which I can of course give some information on transduction of colicinogeny by phage.

I am not coming by plane but I am traveling by car. I expect to stay overnight in Chicago and to arrive in the late morning or early afternoon in Madison on June 9th.

Yours sincerely

Lois Fowler

P. FREDERICK
