Dr. Joshua Lederberg
Genetics Building
The University of Wisconsin
Madison 6, Wisconsin

Dear Joshua:

A word to put in print my statement that we would indeed be interested in a good introduction to medical genetics. If and when the three of you actually move toward the preparation of such a manuscript, I will count on you to have the postman ring my doorbell with the news.

Just as important, I repeat that I hope that the near future provides an opportunity for all of us to get together in the Bay area--indeed, at our home. It would be a great pleasure to have Esther and you with us when you are not under the pressure of catching a plane.

Until then, my best to both of you and Dr. Cavalli.

Cordially yours,

Bill
