Professor and Mrs. Joshua Lederberg  
Department of Medical Genetics  
University of Wisconsin  
Madison 6, Wisconsin

Dear Esther and Josh:

We are personally very happy to learn officially what we had already heard unofficially--that you come to Stanford after another year. With visions of what Verne has told me of Madison's winters, I trust that this coming one you will greet every dawn with the proper shiver, so that they may be ineffaceably traced upon that inward eye of memory when you join us here in enjoying this region--or when some January you are faced with the low fog that is sometimes several inches deep.

Meanwhile, have fun! I would just like to run across your track in Italy.

As ever,

*Beefrum*
