Dear Dr. Ledeburg,

I'm sorry I haven't written sooner. I am presently trying to make up my mind about jobs this summer (Dr. Wessells has offered me a job working in his lab since I talked to you last).

My situation at the end of this semester will be essentially as I described it to you. However, I was unable to take the Engineering Service Dept. course in computers and computer programming. The best I would be able to do would be a few day vocational oriented course in Fortran.

In light of this I would appreciate a re-description of the job you have in mind, both in terms of responsibility and of time and money.

Paul - I've talked to Dr. Wessells & think that his job would be your best bet since you were not able to take in the Fortran programming course.

Good luck

J.C.

5/9/65 Thanks, I accept your advice, and appreciate the job offer.
P.G.
