Dear Joshua!

In Germany this summer is cold and rainy. Receiving your beautiful blue card of Dorr County we get a deep longing to this fashionable sunny peninsula with his abundance in flowers, a botanical eldorado. We thank Esther and you very much for the nice card.

Many thanks to for the reprints, I am mostly interested concerning your work about protoplasts and Lphase of E. coli.

Juli 30. I start to Stockholm: first I wish to visit the Ørskovs ^{and} to see the Serum Institute in Copenhagen. Then I am happy to see Esther and you in Stockholm and to be able to discuss with you some problems in starforming bacteria.

Few days ago I get a letter of Tetsuo Iino. He comes also to Stockholm and perhaps we make the return-journey together.

With regards to Esther and to Anne, Jacouie, Allan and Newton

from Durrant to

I am sincerely yours

Wolfram
