V. R. SMITHAM
CITY MANAGER

PUBLIC HEALTH DEPARTMENT
J. W. BASS, M. D.
DIRECTOR

October 14, 1946

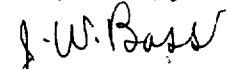

Mr. Joshua Lederberg
Osborn Botanical Laboratory
New Haven, Connecticut

Dear Sir:

We have few specimens of Salmonella, those which have come to our attention have been the typhi strains.

In Texas, the typing of Salmonella is done by Dr. MacDonald Fulton, University of Texas Medical College, Galveston, Texas, to whom we are referring your letter of October 8, 1946.

Very truly,

J. W. Bass, M. D.,
Director of Public Health
