Dr.J.Lederberg,
Yale University,
Osborn Botanical Laboratory,
NEW HAVEN, Conn.
U.S.A.

Dear Dr.Lederberg:

I am in receipt of your letter of 28th September
and have pleasure in sending to you the following "ammon-
weak" Salmonella cultures:

76 S.paratyphi A
77S " A var.durazzo
78S.typhi 2 (typhoid)
79S " Watson (typhoid)
80S.sendai
81S.blegdam "ammon-weak" } Variations of the same
82S. " "ammon-strong" } strain

I did not store other different isolations of the
same serological type. Please be very careful in working
with these cultures as they are dealing with high pathogenic
strains.

With best regards,
sincerely Yours,

Dr.F.Kauffmann
