Prof. J. Lederberg  
Department of Genetics  
Medical School, Stanford University  
Palo-Alto, California, U. S. A.

Dear Professor Lederberg:

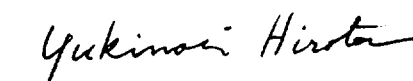

During last decade, we have been realizing the importance of molecular genetics and from that point of view we are now planning and making various efforts for establishment of an institute of this field at Osaka University.

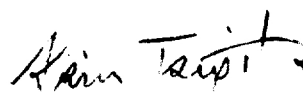

To bring into realization of this institute as soon as possible, it is important and also powerful for us to have supports not only from our country but also from world wide famous scientists like you in the case of negotiation with Japanese government:

Therefore, we shall be very much obliged to you if you would send us a letter to give courage in order to realize our desire, as soon as possible.

Very sincerely yours,

  
Hideo Kikkawa

  
Yukinori Hirota

  
Akira Tsugita

  
Hisao Uchida
