BLOOMINGTON, INDIANA

Science Hall 101

DEPARTMENT OF ZOOLOGY

September 22, 1949

Dr. Joshua Lederberg
Assistant Professor of Genetics
College of Agriculture
The University of Wisconsin
Madison 6, Wisconsin

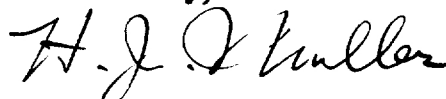

Dear Lederberg:

I had the same idea as you about assigning my article, "The Gene", to a class for their reading. Unfortunately I have only ~~five~~ ^{three} copies left, these being extras that I had mimeographed since I was originally supplied with only 250 copies by the British. However, I find that I saved the stencils, so I will send these in to have some more mimeographed.

In the meantime, I am sending you three of ~~my~~ ^{the} mimeographed copies which I have now, and will hold the others for my own class. As the University is just opening, the mimeograph bureau is probably very busy, and so it may be that you will not get the other copies for some weeks.

With kindest personal regards to you and Mrs. Lederberg,

Yours sincerely,

H. J. Muller
