Dear Josh -
Many thanks for
sending the reprint of your
diphasic flagellar work. - I
had missed this excellent
expose' completely. Is there
any news re the "state"
of H₂ since this publication?
I'll wait until I see you
for an answer. Do you think
a similar answer could
serve for the peculiar fixity
of antigenic "mutations" in
the typanosomes - & possibly
in the influenza viruses?
This is a fascinating subject.
Again, thanks.

Jil.
