Re: "Regulation of enzymatic activity in the intact cell,
The β -D-galactosidase of Escherichia coli." (Rotman)

Dear Doctor Sussman:

Doctor Lederberg has suggested that I send you the enclosed manuscript by your brother.

It will be greatly appreciated if you can spare the time to read the manuscript carefully, check the grammar and then have the entire manuscript retyped. The paper was returned to your brother once. He made the corrections on separate pages but did not insert them in the manuscript.

The members of the Board who have read the manuscript believe it is interesting and worthy of publication. However, in its present form I am afraid the typesetter would make many mistakes and then we would have many expensive alterations, on the galley proof.

We have had the manuscript since early in November, and I wish to send it to the printer as soon as possible.

With many thanks and best wishes,

Sincerely yours

J. R. Porter
