Hi Ruth: EAGOR

Ethelyn Lively wrote me that she's interested in finding another job since Sol's going away next summer, and the place is "~~going into~~ enzyme chemistry". I remember that you were possibly interested in her last year, but may have hesitated to encourage her away. Norton knows her, of course, or Hotchkiss may find it handy to have a micromanipulator artists, for that matter.

Esther says she just wrote you, but best wishes again anyhow, and when are you coming out this way?

Yours,

Joshua Lederberg
