Dear Bruce:

I'll need some time to think over plans based on your last letter. Meanwhile, I would appreciate it very much if you could criticize the enclosed ms. We are planning to send it to J. Bact. in the very near future, in essentially the present form, plus whatever criticisms we can accomodate. [However, tables 2, 3, and 4 will be accomodated into the text].

Have you met Roger Stanier? He's leaving soon for Paris, but right now is in Ochoa's lab in Pharmacology.

Sincerely,

Joshua Lederberg
