Dear Steve - & Paul,

... Well, like waiting until the
last minute to tell you that I'm
flying to San Francisco next Sunday
night^(April 3) and hope to come down to
Paleo sets on Tuesday - returning here
late Tuesday night. I see from the
A.C.P. program that pool is tied up
Tuesday morning. But I hope to
see you in the afternoon in any case.
We've just gotten a pile of the
TDR - some found out of Y-10, but I
don't know whether it's covered while
spring back any further in the pedigree of
W3652. Even Y-10 will make the
prostate problem a little simpler.
Do you know anything about the
Kontagis of this line? W3652

STROMINGER, A.L.

produces a very mucoid capsule (?)
material under some conditions,

looking forward to seeing you,

See the case,

Paul G. Tompkins
