

WAINWRIGHT

(was Schneider  
Ryan's assistant)

February 14, 1955

Dear Lil:

Thank you for your note of last December, and welcome back to the U.S. I'd have answered sooner, but realized you'd be in transition. We hope you're happily settled now: we're sure you will find working with Dave a stimulating and rewarding experience. I was interested in your comment on heterokaryosis, which was, as you remarked, parallel to our experience. A couple of other people, I have found, have run into the same. Only lately, now that he obtained some double auxotrophs, has Bradley gotten some confusing hints of anything more interesting. He asks me to thank you for your offer of strains. At the moment we are tied down with our present material, but we hope to keep it in mind for future eventualities.

Yours sincerely,

Joshua Lederberg

(of December)
