Dear Carl-Goran:

I am sorry that I will not have a chance to see you at the meetings in Mexico City. Is there any chance of your returning via SFO, particularly so that we might discuss some recent developments in the CBW field?

I will be attending the CCD (formerly ENDC) meetings at Geneva next week as a consultant (though quite unofficial) at the behest of the Arms Control Agency, and I would like the opportunity of comparing notes with you afterwards. I hope to be at home for some while after ~~that~~ my return (on August 8).

May I say how valuable I found the SIPRI volumes on the subject. In fact, may I impose on you for a great favor, to furnish us with one (if possible two) additional sets for use by the students in a course we are teaching this fall on arms control and disarmament (expected enrollment 200-300). Please bill me for any charges or expenses on this.

Sincerely,

HEDEN
