re Country Egypt. in C.S.

Perhaps three years ago, George Forsythe had asked me if I would like him to look into this title for me. At that time, I demurred, but now it seems like it might be a very appropriate counterpart to my role in Secmem, and might have some pragmatic advantages in re Dept of C.S. policies re Gene Buchanan, AF, etc. I would not generally expect to do (or receive) anything different from recent history having major issues. If you are sympathetic to the idea would you make some inquiries?
