re your correspondence with Goodlin

I fully understand your repugnance about opening the AJHG to correspondence about infanticide. I keep in mind that the society was founded in reaction against the Eugenics group, to retain ~~as~~ a forum for expert scientific discussion.

He did ask me ^{if} I could add to the documentation about ~~XXXX~~ Nazi infanticide and the role of geneticists therein. I am a little hard put to respond to this precise formulation., I did send him some clips on euthanasia from the Fest and Grunberger books on Nazi Germany.

I did not wish to provoke him by also sending the attached, which is just to you. It really is no argument pro or con abortion, but by the same token infanticide, that the Nazis had made some use of it.

Sincerely,

PROFESSOR JOSHUA LEDERBERG
