WASHINGTON, D.C. 20510

ROBERT O. HARRIS, STAFF DIRECTOR
JOHN S. FORSYTHE, GENERAL COUNSEL

November 24, 1969

Joshua Lederberg
Genetics Department
Stanford University
Stanford, California

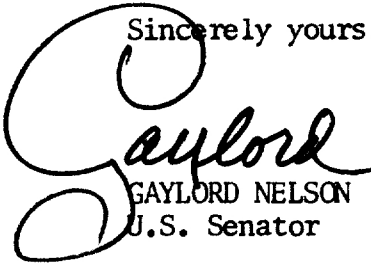

Dear Joshua:

Your articles on food additives and mutagenic and carcinogenic elements in the environment have been read with great interest. I hope to hold hearings soon on some aspects of these matters, though I have made no official announcement at this time.

A survey on the epidemiology of DDT in relation to cancer and hypertension is most intriguing and, perhaps, could become a new chapter to the pesticides story.

Your insights and knowledge on these matters are, as usual, of great concern and use to me.

Sincerely yours,

GAYLORD NELSON
U.S. Senator
